PREFACE

The Department of Advanced Education works with other government departments to ensure that there are adequate numbers of appropriately trained persons to provide the health and social services required by Albertans. The Alberta Health and Social Services Disciplines Committee, comprised of representatives from the Departments of Advanced Education, Career Development and Employment, Health, Family and Social Services, and the Professions and Occupations Bureau, coordinates government efforts to monitor manpower issues related to the provision of health and social services. This includes the annual gathering of data to assess the supply and demand status of health and social service manpower.

The Inventory provides information on the output of health and social service education programs in Alberta. The data, which primarily report enrolment and graduate statistics, are used in conjunction with information provided by the service sector to anticipate future demand which may be placed on the post-secondary education system, and assess the capacity of the system to meet that demand. Additional information on manpower supply and demand is available in the Alberta Health and Social Services Disciplines Committee publication, *Health and Social Service Manpower in Alberta.*

The Inventory does not provide descriptions of the various health and social service programs offered. Calendars providing detailed program descriptions can be obtained by contacting the registrar's office of the appropriate vocational centre, college, school of nursing, technical institute or university.

The information in this edition of the Inventory spans the academic years 1984-85 to 1988-89. Enrolment and graduate data are updated on an annual basis.

Further information on the Inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of education programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates for the academic years 1984-85 to 1988-89; length of programs; intake and graduation dates; quotas; and,

3. a "Comments" section to explain the data when necessary.

The tables differentiate between part-time and full-time students wherever possible. If this is not possible, a comment is added to indicate that the information has been merged, and that the data is aligned in the centre of each column.

Academic year	1984-85	1985-86	1986-87	1987-88	1988-89
Quota				50	50
Applicants	" "	" "	" "	" " 100	" " 150
Enrolments 1st year 2nd year				 50 50	 50 45
Graduates					43

If information on the attrition experienced by a particular class is being sought, it can be obtained by following a cohort of enrolments from first year entry through to graduation. For example, in the above table, the second year enrolments shown in 1987-88 represents the same class shown in first year during 1986-87. The number of graduates from this two year program is reported in 1987-88. The attrition over two years is seven students, as two failed to graduate in their final year. Footnotes are provided to explain discrepancies between enrolment years and the number of graduates from the last year of study.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Program Coordination Branch of Advanced Education sent request forms to 25 institutions to obtain enrolment and graduate data for 133 post-secondary programs in the various health or social service disciplines. The format of the request forms is identical to the table format used in the Inventory. Institutional staff were asked to fill in the required information for the most recent academic year and to return the forms. Follow-up telephone calls were made when required.

Terms used in the data request forms were defined as follows:

1. **Applicants**: the number of qualified applications submitted to a program, from which enrolment was chosen for a given academic year.

2. **Enrolments**: the number of students accepted into a program by academic year of study whenever the duration of the program exceeds one year.

3. **Graduates**: the number of students who successfully completed all program requirements and were awarded a certificate, diploma or degree.

4. **Academic Year**: the period commencing September 1 to August 31 of the following year (e.g. September 1, 1988 to August 31, 1989).

In interpreting data, it is important to note the following:

1. The quota refers to the optimal capacity of a program, and is used as a general guideline for determining maximum intake. Quotas are occasionally exceeded due to anticipated attrition or student transfers between programs.

2. The deadline for accepting applications varies from program to program. While some programs adhere to a set deadline, others limit the number of applications accepted.

3. Students often apply to more than one program in any given year. For some programs, students will apply to an affiliated health and social service agency rather than to the program directly.

4. Enrolments are classified according to year of study depending upon the level of the majority of courses taken. Enrolment figures may increase between years of study due to students transferring into a program or repeating a year.

5. The comments which follow the enrolment data attempt to clarify the information provided and should be reviewed carefully to avoid misinterpretation.

6. Provincial summaries are provided on peach colored pages preceding each program category. A breakdown of the enrolment data by institution is provided in the pages immediately following the summaries.

COMMENTS:

1. The quota may be exceeded due to students transferring into the program or repeating their first year.
2. See individual programs for qualification of the data.
3. The University of Alberta offers a four-year program, while the University of Calgary offers a three-year program; hence the low numbers for fourth-year enrolments and the apparent disparity between fourth-year and graduate figures.

Enrolments[2]	215	25	31	30	26
Graduates	26	30	11	34	16

COMMENTS:

1. The quota for the first course in the program is 100, and 50 for all courses thereafter.
2. The program is offered by distance delivery and is geared to part-time students. Those who wish to may complete the program within one academic year, though few do . This accounts for the low number of graduates in comparison to enrolments. The reporting format was revised in 1985-86 to reflect only new program applicants and a FTE enrolment count.

COMMENTS:

1. Data are provided for both the on-campus and outreach program.
2. Up to and including 1987-88, the quota was calculated in FTE's. In 1988-89, it is in individual part-time students.
3. Enrolment data since 1986-87 are in FTE's.
4. Graduate figures include both full-time and part-time students. These may at times exceed enrolments, since part-time students in the off-campus program often require two years to graduate.

1. Enrolment data refer to the on-campus program and the brokered program at AVC Grouard. A separate category for Nursing Assistant Refresher was included in the 1987 edition; hence the variance in enrolment data from those provided for the regular program in previous editions of the Inventory.
2. In 1988-89, includes Outreach Programs at Beaverlodge, Drayton Valley, Wabasca and Grouard.
3. Determining the number of applicants is difficult since applications are carried over from one intake to another, and students may be referred from manpower offices rather than apply directly to the program. In 1987-88, on-campus classes were filled from students on a waiting list.
4. The figures are for AVC-Edmonton programs only (figures are not available for the Outreach and Brokered Programs).
5. Enrolment and graduate figures include data from off-campus locations.

COMMENTS:

1. In 1986-87, in addition to the 40 spaces in the basic baccalaureate program, an accelerated route was introduced for a three year period. Forty spaces were available in the accelerated program, wherein students entered the third year of the program and completed it after 24 uninterrupted months.
2. Students enroll in a pre-professional year and are admitted officially to the second year of the program. Enrolment data include both full-time and part-time students. Increases in fourth-year enrolments resulted after admission was granted to post-diploma students.
3. Graduates include both full-time and part-time students.

Fourth Year	60	67	77	106	104
Graduates	60	66	77	101	103

COMMENTS:

1. The quota figures make allowance for transfer students, but do not include continuing second-year students. The quota reduction in 1985-86 reflects a program revision intended to reduce attrition and increase the number of graduates of the program.
2. Transfer students with credit for first-year course work have in the past been admitted into the second year of the program; hence the discrepancy in enrolment from year to year.

COMMENTS:

1. The quota does not include 22 spaces temporarily available for a Degree Completion route established for practitioners holding a diploma from a foreign educational institution.

1. The University of Calgary offers this program in Edmonton and Lethbridge, through cooperative links to the Universities of Alberta and Lethbridge. Figures include data from all three locations.
2. Except for mature, non-matriculated applicants, students are not eligible for admission to the Faculty of Social Welfare until the second year.
3. Graduates include both full-time and part-time students. Students do not always convocate within the same reporting period as when they complete the program; hence graduate figures may exceed fourth-year enrolments.
